STATE BOARD OF TECHNICAL EDUCATION AND TRAINING
TELANGANA, HYDERABAD
EXAMINATION FOR THE GRANT OF COMPETENCY CERTIFICATE
TO ELECTRICAL SUPERVISOR
PAPER - I ELECTRICAL THEORY
MODEL PAPER

Time: 03 Hours

Max. Marks: 50

Note: (1) Question No. 01 and 02 are compulsory, each carries 09 marks.

(2) Answer any 04 from (Q.No. 03 to 10) remaining 08 questions, each carries 08 marks.

1. (a) State and explain Ohm's Law and mention the units in which quantity involved are measured. 4
(b) When two resistances are connected in series the total resistance of the circuit is 6 Ohms. Find the value of the two. 5
2. (a) Draw the external and internal characteristics of DC shunt, series and compound generators and mention their practical applications. 4
(b) Why a starter is necessary for D.C. Motor? Explain with a neat sketch. 5
3. What steps do you take to rectify the following defects?
 - a) A.D.C. Shunt Generator failing to build up voltage. 3
 - b) A.D.C. shunt motor running in wrong direction. 2
 - c) A three-phase induction motor running in wrong direction. 3
4. Enumerate the various steps which have to be taken to ensure successful parallel connection of one alternator with another which is already connected to bus bars and which is supplying the load. 5
How would you then proceed to make the newly connected alternator to share the total load? 3
5. (a) Explain the principle of working of an induction motor. 4
(b) A 4-pole alternator running of 2000 R.P.M. supplies a six-pole induction motor. What is the actual speed of running of motor if the slip of 3%? 4
6. (a) What are the essential tests to be conducted on a wiring installation after completion and before connecting the supply? 4
(b) What is meant by (i) PVC (ii) CTS (iii) 7/20 4
7. (a) Briefly explain the factors which influence the choice of site for Thermal Power Station. 4
(b) A 3 phase electric motor drives pump which lifts 6,000 liters of water per hour to height of 30 meters. The efficiencies of pump and motor are 80% and 90% respectively. Calculate the current taken by the motor at 440 volts at power factor of 0.8 4
8. (a) Explain the principle of working of single-phase transformer. 4

- (b) Describe a suitable test for locating earth fault in an underground cable. 4
9. (a) Explain two methods of charging of 'leadacid' batteries. 4
(b) Briefly explain (i) Skin effect (ii) Ferrenti effect (iii) Proximity effect in overhead transmission lines. (1+2+1)
10. Write short notes on any TWO of the following 2 x 4 = 8
- a) Star – delta starter for A.C. Motor.
 - b) Methods of Earthing.
 - c) The effect of heat and moisture and insulation lubricants and their uses.
 - d) First aid treatment for Electric shocks.
 - e) Short-circuit test on transformer.

STATE BOARD OF TECHNICAL EDUCATION AND TRAINING
TELANGANA, HYDERABAD
EXAMINATION FOR THE GRANT OF COMPETENCY CERTIFICATE
TO ELECTRICAL SUPERVISOR
PAPER – II ELECTRICITY UTILISATION
MODEL PAPER

Time: 03 Hours

Max. Marks: 50

Note: (1) Question No. 01 and 02 are compulsory, each carries 09 marks.

(2) Answer any 04 from (Q.No. 03 to 10) remaining 08 questions, each carries 08 marks.

1. (a) State the systems of wiring with the application. 4
(b) Estimate the material required for CTS. Wiring System used in a hall measuring 30' x 60' and height 10' and the requirements are as follows: 5
 No. of lights points = 32
 No. of Fan points = 6
 No. of 2 Pin Plug Sockets = 2
2. (a) Explain with a connection diagram the method of calculating power factor of a three-phase load by two "Wattmeter method". 4
(b) A 400 V, 3 phase motor has a full load of 10 H.P. the P.F. being 0.85; full load efficiency is 80%. Find the reading on each of the two-watt meters connected to measure the input. 5
3. (a) List out the common defects/faults in the electric pumps. What are the remedies for their rectification? 4
(b) Explain briefly the rules adopted in the installation of electric motors and furnaces. What is the procedure adopted for their maintenance? 4
4. (a) Explain with the help of connection diagram the working of a star-delta starter and show the method of its connection to a motor installation? 4
(b) Why is earthing required for machines and electrical installation? Explain briefly the method of system earthing or equipment earthing. 4
5. (a) Draw a neat connection diagram for D.C. Compound motor with a starter and field regulator. 4
(b) Show, with a neat connection diagram; the main and sub-distributing board with circuit breakers switch fuse units and load particulars of each circuit of an electrical installation. 4
6. (a) Mention the name of the different tariffs used in practice. 4
(b) A consumer is offered electricity at the following tariff: 4
 Rs. 70 per KVA of his ma. demand plus; 5 paise per unit consumed. The consumer has an aggregate motor load of 250 KW at a p.f. of 0.8 lagging. Calculate the consumer's annual bill for a load factor of 100% and if the motor runs for 12 hours a day.
7. (a) Explain with the help of a neat diagram the construction and working of a Meggar and state its uses. 4

- (b) Explain with the help of wiring diagram electrical connections for lifts with their protective devices. 4
8. (a) Explain with the help of a neat diagram the construction and working of a single-phase energy meter. 4
(b) List out the errors taking place in the energy meter. What are the remedies for removing them? 4
9. Draw a complete electrical wiring diagram of the mains and distribution boards to the following machines in workshop. 4+4
(i) Lather machine (ii) Drilling Machine
10. Write short notes on any three of the following: 4x2=8
marks
(a) Electrical bell (b) Lightning arrester (c) Circuit breaker (d) Fuses

STATE BOARD OF TECHNICAL EDUCATION AND TRAINING
TELANGANA, HYDERABAD
CERTIFICATE OF COMPETENCY EXAMINATION FOR SUPERVISOR
UNDER CENTRAL ELECTRICITY AUTHORITY
(MEASURES RELATING TO SAFETY AND ELECTRIC SUPPLY)
REGULATIONS, 2018

I. INSTRUCTIONS TO THE CANDIDATES:

The certificate of Competency Examination for Supervisor will be held at the following Polytechnics:

Center Code	Name of the Polytechnic	Center Code	Name of the Polytechnic
01	Govt. Polytechnic, Masab Tank, Hyderabad	26	S.G. Govt. Polytechnic, Adilabad
02	J.N. Govt. Polytechnic, Ramanthapur, Hyderabad	27	Govt. Polytechnic, Nalgonda
04	Govt. Polytechnic, Warangal	46	Govt. Polytechnic, Kothagudem
05	Govt. Polytechnic, Nizamabad	61	Q.Q Govt. Polytechnic, Hyderabad
06	Govt. Polytechnic, Mahaboobnagar	87	Dr.BRAGMR Polytechnic for Women, Karimnagar
23	S.S. Govt. Polytechnic, Zaheerabad.		

Note: If number of candidates registered for Supervisor examination at any of the above centers are less than 25, then the candidates will be re-allotted to some other center and also if the total number of candidates registered for Supervisor examination at a particular center are greater than 80 (Eighty) only then the candidates may be re-allotted to some other center at the discretion of the Secretary, State Board of Technical Education and Training, TG., Hyderabad.

II. ELIGIBILITY TO APPEAR:

Candidates satisfying the following rules and regulations are only eligible to appear for the examination:

Supervisor (Certificate of Competency) Examination:

- a) The candidate for admission to appear for the Supervisor (Certificate of competency) Examination should possess either of the following:
 - A pass in SSC or equivalent examination with not less than 8 years' experience in the practices of Electrical Installation works.
- OR
- A pass in SSC or equivalent examination with a Wireman or Electrician ITI certificate holder with not less than 4 years' experience in the practice of Electrical Installation works (irrespective fields)
 - The experience shall be certified by a firm or a Licensed Electrical Contractor whose license is in force during that period and counter signed by an Electrical Engineer not below the rank of Deputy Electrical Inspector (Electrical Inspectorate) / Divisional Engineer in TG Transco/TG Genco/TG Discoms.
- b) The minimum age limit for appearing for examination shall be 23 years as on 1st July 2026 for the examination to be held in the 2nd half of the year and shall not have completed the age of 60 years.
- c) National Apprentice training of 1-year duration after passing ITI Examination shall be counted as practical experience.
- d) The practical experience put in after passing requisite qualifying examination only will be considered. The experience certificate submitted by the candidates as apprentices appearing for the Supervisor

Certificate of Competency Examination shall be obtained from the Licensed Electrical Contractors whose license is in force during that period. Xerox copy of license shall be enclosed or any other established industrial units or firms or Public or Private Undertakings and in the case of Supervisor/Mines, the experience certificate shall be from their respective Manager/Head of the Mining institutions.

III. MODE OF EXAMINATIONS:

- a) Examination for Supervisor Certificate of Competency comprise the following:
 - 1. Two written papers of 03 hours duration each.
 - 2. Practical and oral on the subjects specified in the prescribed syllabus of 06 hours duration.
 - Provided that no certificate shall be issued unless a candidate passes each paper I and II. Candidates who have passed in Paper I and II desire to qualify for domestic installation are exempted from re-appearing in Paper-I.
 - In addition, candidates intending to appear for Supervisor examination shall be capable of answering either in English or in Telugu or Urdu. Such candidate desirous of writing the Examinations in URDU medium should apply onto the Principal, Government Polytechnic, Masab Tank, Hyderabad.

IV. HOW TO APPLY:

- a) Application forms with instructions to candidates can be downloaded from the website sbtet.telangana.gov.in
- b) Application form duly filled in and supported by documentary evidence should be submitted to the concerned Principal of the examination center at which the candidate wants to appear for the examination so as to reach him on or before the date prescribed in the Notification. The filled in application shall be sent by Registered Post/handed over in person. The cover being super scribed as “APPLICATION FOR SUPERVISOR EXAMINATION”.
- c) Three recent pass-port size photographs are to be affixed as follows: One on the application form, the second one on the Original Hall ticket and the third one on the Duplicate Hall Ticket in the space provided. The Photographs are to be attested by a Gazetted Officer of the State/Central Government. The Signature of the Officer and the seal shall occupy partly on the photograph and partly on the Hall Ticket/application form as the case may be.
- d) The following certificate/ documents are to be enclosed along with the application form:
 - 1. Examination fee of Rs. 2000/- for candidates appearing for Supervisor examinations should be paid through QR Code available with Principal of Examination Center.
 - 2. Original and Duplicate Hall Tickets duly filled in and affixed with photographs and attested by Gazetted Officer.
 - 3. Attested memo of marks secured at SSC or equivalent examination / ITI for Supervisor examinations.
 - 4. Certificate of experience should be on reverse page of the application form issued by the employer.
 - 5. Certificate showing the Date of Birth from the records of the School or College.
 - 6. A self-addressed envelope with required postage of Rs. 30/- for dispatch of Hall-Ticket and time table.

V. ACCEPTANCE OF APPLICATIONS FORMS:

The Principal of Polytechnic to whom the application is submitted reserves the right to reject the application of any candidate if:

- 1. The application is incomplete.

2. Required certificates are not enclosed.
3. The candidate fails to satisfy the conditions of eligibility.
4. The candidate furnished false or incorrect information.
5. The information in the application is not legible.
6. The application is received after the due date.

VI. HALL TICKETS & EXAMINATIONS:

After scrutinizing the applications, the concerned Principal of the Polytechnics will send Hall Tickets to all the eligible candidates so as to reach them before the date of examination. In case any candidate is not in receipt of Hall Ticket, he may contact the Principal of the concerned Polytechnic personally two days earlier to the examination to find the actual position, during the working hours.

The candidate may obtain the Duplicate Hall Ticket if he is eligible to appear on production of an Identification certificate on payment of Rs. 100/-cash.

The detailed examination time table will be communicated by the Principals of the examination center along with the Hall Ticket.

VII. RESULTS OF EXAMINATIONS:

The result will be declared by the Chief Electrical Inspector to Government who will issue Competency Certificates and permits to the successful candidates. Every care will be taken to avoid errors in the valuation and tabulation of results. Hence, any request for revaluation and re-totaling will not be entertained.

ANNEXURE

SUPERVISOR EXAMINATIONS

1. Examination for Supervisor will consist of:

a) The following written papers each of three hours duration and each carrying 50 marks.

PAPER-I	-	Compulsory Electrical Theory (Elementary Knowledge)
PAPER-II	-	Optional Electricity Utilization (to be taken up by the candidates desiring to qualify for domestic industrial and other installations)

- The model of the paper is mainly essay type with simple mathematical calculations and shall consists of 10 Questions of (a) and (b) parts.
 - Question No. 1 and Question No. 2 are compulsory, each carries 09 marks. 02x09=18
 - Answer any 04 from remaining (Q.No. 03 to 10) 08 Questions. Each carries 08 marks 04x08=32
- Total=50 Marks.

b) An oral and practical test of 06 hours duration carrying 100 marks.

i.	Experiment on electrical machines (basing on the syllabus of paper-I)	-	03 Hrs- Viva-	40 Marks 10 Marks
ii.	Wiring installations / fault location rectification on generators, motors and domestic appliances / Underground cables (Murray loop test) / circuit connections of starter, motors and energy meters.	-	03 Hrs- Viva -	40 Marks 10 Marks

(relevant experiment to be given for supervisory utilization on the syllabus of Paper II

For each examination

Total - 100 Marks

Provided that no certificate shall be issued unless a candidate passes in papers I and II and practical examination. Candidates who have passed in Papers I and II desire to qualify for domestic industrial and other installations as the case may be shall be exempted from re-appearing in Paper-I.

2. Marks for pass in examination for Competency Certificate of Supervisor:

For a pass in the Examination for Supervisor a candidate must secure

- 20/50 marks in each written Paper-I & II
- 20/50 marks in each oral and practical test of Paper-I (20/50) & Paper-II (20/50) for Utilization.

SYLLABUS
PAPER-I
ELECTRICITY - THEORY (ELEMENTARY KNOWLEDGE)

1. **Principles of Electricity:** Electrical pressure, current and resistance, ohms law, specific resistance, laws of resistance in series and parallel calculation of voltage drop, practical units of voltage, current resistance, power and energy, relation between electrical power (KW) and mechanical power (HP) Electromagnetism. Production of E.M.F. and Fleming's right-hand rule, magnetic, chemical and heating effects of electrical current - magnetic, properties, electromagnets and their applications. Simple numerical problems.
2. **Materials:** Conductor's and insulators, semi-conductors, classes of insulating material and their relative merits. Transformer oil effect or heat moisture on insulation, gas insulators, lubricants and their uses. Different types of wires, cables, switches, circuit breakers, cut outs etc., and their safe current carrying capacity, use of table and data sheets general given in electrical hand books.
3. **A.C. Circuits:** Knowledge of vectors, phase, and phase difference resistance inductance and capacitance in A.C. Circuits; periodicity or frequency; power and power factor of single phase and three phase systems. Star and delta connection phase sequence.
4. **Generations of Electricity:** Natural sources of energy. Solar, wind power. Thermal power, hydel and nuclear power generation concepts and flow charts.
5. **Generator:** Essential components and constructional features of shunt, series and compound dynamos and their characteristics, causes of sparking inter poles commutator and the maintenance of carbon brushes. Principles, operation and construction of Alternators. Changeover switches and connections.
6. **D.C. Motors:** Theory of series, shunt and compound wound type motors their uses, installation method of starting and speed control and reversal of direction rotation.
7. **A.C. Motors:** Theory of induction (Squirrel cage and slip ring type) synchronous and commutator; motor, their use, installation, method of starting and speed control and reversal of direction of rotation. Principles and operation of motor generator sets for AC/DC conversion.
8. **Transformers:** Knowledge of single phase and three phase transformers, their construction, use and maintenance, parallel operation, working of auto-transformer, CT and PT. Transformer tapings. Cooling of transformers.
9. **Controlling and regulating gears:** Knowledge of various types of switches and circuit breakers and cut-out, starters, regulators protective devices for both A.C. and D.C. and D.C. Motors and their wiring with the motors.
10. **Batteries:** Primary cells, dry cells, storage or secondary batteries or accumulators and their installation lead acid cell, nickel iron or alkaline cells, initial and subsequent charging of batteries methods of charging, maintenance of batteries. Use of Hydro-meters.

- 11. Electronics:** Semiconductor devices, concept of rectifiers, filters, amplifiers, inverters. Basic concept of power electronic devices. Block diagrams of converters, inverters, cyclo converters, and speed control of AC motors using power electronic circuits.
- 12. Transmission & Distribution:**
- a) **Overhead Lines:** Simple calculations lines constants and voltage drops general Principles of construction of low, medium and high-pressure line; size of conductors, length of spans sag, strength of poles, spacing of conductors, cross arms, effects of temperature wind pressure, ice and snow, tension on wires, insulators brackets stay, struts; guard wires and their protective devices. Skin effect Proximity effect and Ferrarit effect. Earthing lightening; arrestor and lightning conductors and their testing and fault location.
 - b) **Underground Cables:** Simple calculations and general principles of laying cables direct in ground; in through pipes, handling bending, jointing boxes, distribution board and pillars, joint box compound, melting of compounds and filling boxes with compounds. Testing and fault location.
- 13. Illumination:** Metal filament lamps, Fluorescent lamp circuits. CFL and LED lamps, photometric units and simple measurements, general requirements of efficient lighting and its elementary calculations. Street lighting. Time switches and LDR circuits for auto switching.
- 14. Safety Regulations:** Central Electricity Authority (CEA) (Measures related to safety and electric supply) Regulations, 2010. Protection and restoration of persons suffering from electric shock.

SYLLABUS PAPER-II ELECTRICITY UTILIZATION

DOMESTIC INSTALLATIONS:

- 1. **Wiring:** Wiring layouts of different types conduit (surface and concealed) pvc casing caping and armored cable for lighting and power installations in residential premises together with the necessary switchgear. Estimates on material and cost of different type of installations.
- 2. **Apparatus:** Installation and maintenance of heaters, cookers, mixers, refrigerators, air conditioners and other domestic appliances, electric bells and indicators, small motors for pumps and electric lifts. Installation and maintenance of generators, electric motors, electric furnaces, electric welding plants, haulage and winding machines, cooling fans and heating appliances.
- 3. **Measurements and charges:** Measurement of power, watt meters, concept of active and reactive power, power factor correction by capacitors. Simple calculations relating to cost of power and energy. Elementary knowledge of methods of charging for demand and energy.
- 4. **Testing and fault location:** Detection and location of faults in domestic appliances and wiring installations. Insulation and continuity tests, detection and location of faults in D.C. & A.C. Generators Motors; overhead distribution lines and underground cables; electric instruments and apparatus.

Rectification faults, insulation & continuity tests. Tests for insulation resistance to earth. Earth resistance testing.

5. **Protective devices:** Elementary Knowledge of the use of fuses, HRC fuses, ELCB, RCCB, and auto cut-out. Earthing of domestic appliances, motors, generators, transformers. Use of lightening arrestors. Lightening conductors on overhead tanks and buildings. Circuit breakers; overload and no volt protection, thermostats and Bi-metallic strips. Relays.
6. **Industrial and agriculture installations:** Wiring layouts of different types of conduit and armored cable for lightning and power installation, in industrial premises together with the necessary switchgear. General principles and elementary calculations of head power and energy requirements for agriculture and domestic pumps. Estimates of material and cost of different types of installation.
7. **Circuit diagrams:** Electrical connection or
 - i. D.C. & A.C. Generators, Switch-board, transformers.
 - ii. Main and sub-distribution board with circuit switch fuse units, with load statement for each circuit.
 - iii. D.C. & A.C. motors, there starters, regulators.
 - iv. Battery charging equipment.
 - v. Lifts with their safety devices.
 - vi. Pump installations.

ORAL AND PRACTICAL TEST

An oral and practical test based on the syllabus for written papers will be held.
